

Carson Roell

AI-NATIVE BUILDER · MARKETING OPERATOR

Toronto, ON (Eastern Time) · carson.roell@gmail.com · 289-380-3049 · carsonr.ai/builder · case study · LinkedIn

Marketing-trained operator (BComm, Guelph) who ships **production software with AI coding agents** — Claude Code daily; Claude API, MCP, and agent orchestration in everything. Solo-built and operate **10+ live systems**: SaaS products, a working CRM, autonomous monitoring, and published MCP servers. I direct the agents that write the code and own everything else: architecture, verification, deploys, billing, and the funnel that sells it. **Available now for full-time remote roles; open to contract.**

Selected live systems — built solo, in production, operated daily

JARVIS — proactive life-OS PWA

2026

- Natural-language capture → AI briefings → push nudges on cron; Neon Postgres cross-device sync; Google Calendar auto time-blocking. Next.js + Claude API.

Foreman — autonomous product-health system

2026

- 3-hour heartbeat health-checks a portfolio of live apps (deploy rot, DB pauses, funnel metrics) → one-tap action cards pushed to phone; headless Claude pipeline runner with budget caps.

LinkRescue — affiliate-link integrity SaaS

2026 · linkrescue.io

- Custom crawler: time-budgeted scans, parallel checking with a concurrency-safe domain limiter, tiered bot-retry strategy; monthly data study (~6,500 links / 50 sites) feeds a published index — product and marketing engine as one system.

AI Commerce Radar — AI audit funnel

2026 · live

- Claude structured outputs grade listings on six dimensions and simulate buyer queries → shareable scored reports with dynamic OG cards, email capture, Stripe checkout.

Job Radar — autonomous scanner

2026 · case study

- Zero-dependency Node service scores ~700 postings/day from three sources and auto-merges the best to a phone card. Role classifier validated against an 800-posting corpus — zero false positives — with a 10-case regression suite.

MCP servers & developer tooling

2026 · npm

- Published SelfHeal (self-healing API proxy: retries, circuit breakers, observability), SiteHealth (zero-key website audit), LeadEnrich (waterfall enrichment).

Experience

Founder — Freedom Engineers (software studio)

2025 – Present · Toronto

One-person studio: every system above, plus a production CRM running a real business

- Full lifecycle solo with agent leverage: research → build → deploy → operate → market. Stripe billing, security hardening (RLS, SSRF guards, rate limiting), analytics, monitoring.
- Built the Cut n’ Roell CRM (Next.js + Neon): quotes, invoicing, lead pipeline mined from municipal permit APIs (Toronto, Vaughan, Barrie, Muskoka).

Owner & Operator — Cut n’ Roell Painting

2023 – Present · Muskoka/GTA, ON

- Built a painting business from zero: referral pipeline, quoting, scheduling, delivery; repeat-business rate high enough to run on referrals. Now managed through the CRM I built for it.

Sales Associate — SalesOptAI

2025 · Aurora, ON

- Inbound/outbound lead engagement and product demos for AI-powered voice reception tools; CRM-driven outreach workflows.

Skills

BUILD TypeScript/Node · Next.js (App Router) · React · Postgres (Neon, Supabase) · Python	AI IN PRODUCTION Claude Code (daily driver) · Claude API · structured outputs · MCP servers & clients · agent orchestration · prompt-injection hardening
SHIP & OPERATE Vercel · Railway · VPS/systemd · Stripe · web push · cron/queues · PostHog · Umami	MARKETING SEO & content engines · funnel design · GA4 · HubSpot · outbound sequences · data-study PR

Education & certifications

BComm, Marketing Management — University of Guelph

2018

Google Digital Marketing & E-Commerce (2024) · HubSpot Inbound Sales & Inbound Marketing (2025) · GA4 certification in progress
